Dear Friend of the Rancocas Conservancy,

With the help of our donors, members, volunteers, and partners, the Rancocas Conservancy continues its collective mission to acquire and maintain critical natural lands and open spaces throughout the greater Rancocas Creek Watershed.

Nearly all of our preserves are open to the public for passive recreation – hiking, birding, photography, nature observation, or simply relaxing and taking a brief respite from our busy lives. The Conservancy actively works to improve access to and enhance opportunities for our members and the general public alike to visit and enjoy the amazing open spaces we work so hard to protect. To locate and become acquainted with our preserves, check our website at www.rancocasconservancy.org.

Two exciting developments occurred since we last reached out to you with news about the Conservancy: We celebrated our 30th anniversary while also achieving national recognition by being awarded accreditation through the Land Trust Alliance (LTA). LTA accreditation is awarded to a select number of land trusts who adhere to responsible organizational policies and practice sound fiscal management.

As always, we depend on the generosity of members and friends like you so that we can continue to: enhance public access and education opportunities, steward our preserves, and acquire additional open space for watershed and habitat preservation. While we recognize the economic situation presents challenges and uncertainty for all of us, hard work alone is not enough to carry out our mission. Accordingly, we humbly ask you to consider supporting our annual partnership appeal by making a financial donation to the Conservancy. Your generosity will make a significant difference by allowing us to continue this important work in our community. Donations can be sent to PO Box 2188, Vincentown, NJ 08088 or made on-line through our website at www.rancocasconservancy.org/donations. **Thank you again for your continued support.**

For the Rancocas,

Steve

Steven Doughty, President
